SUBJECT: Interim Licensing Agreement

This letter is intended to serve as an Interim Licensing Agreement between JanAero Devices, Div. of ELECTROSYSTEMS, Inc. (JAD) and Precision Electronics, Inc. (PEI) until a formal Licensing Agreement is worked out and signed.

Under this Interim Agreement, JAD proposes that it will contract PEI to perform certain work for JAD on a series of JANITROL HEATERS Pressurization Valves. JAD shall provide PEI the necessary technical data, replacement and repair parts, and some test equipment for PEI to perform necessary repair and overhaul services on said pressurization valves. Under this Interim Agreement, JAD will maintain technical cognizance whereas PEI will provide mechanic's labor to effect the necessary repair and overhaul of the valves.

It is expected that this Interim Agreement will be superseded by a formal Licensing Agreement whereby PEI will assume status as an Authorized Service Center for JAD on these valves. Valves covered by this Agreement are:

CONTROLLER	OUTFLOW	SAFETY
50E00-1	05E05-2	05E10-1
88060-4	88030-2	88000-2
88070-2G/1	88030-4	88000-4

We look forward to a continued working relationship between JAD and PEI.

Sincerely,

Wm. D. Averis  
Director
